

# Rafael Dolfe

## Senior Unity Developer

6+ years · C# / .NET · Games & Interactive Applications

[rafael.dolfe@gmail.com](mailto:rafael.dolfe@gmail.com) · [rafaeldolfe.com](https://rafaeldolfe.com) · [LinkedIn](#) · [GitHub](#)

**Portfolio:** [rafaeldolfe.com](https://rafaeldolfe.com) — Recently updated with a technical deep-dive into **Lost In The Open**: combat systems, procedural generation, AI, fog of war, pathfinding, and more.

## Summary

6+ years shipping complex Unity applications. Led Black Voyage Games' tactical roguelike *Lost In The Open* from concept to Steam Early Access (Sep 2025). Deep expertise in C#/.NET architecture, algorithms, UI, procedural generation, AI, multiplayer, and cross-domain integration. Comfortable owning an entire technical stack, from gameplay and editor tools to pipelines and optimisation.

## Experience

### Lead Unity Developer on *Lost In The Open*

*Black Voyage Games* · Q1 2020 – Present

- Technical lead across a multi-discipline team (art, animation, audio, design, writing) on a tactical roguelike released on Steam Early Access in Sep 2025.
- Built the full technical stack in C#/.NET: turn-based combat, enemy AI, fog of war, procedural map generation, pathfinding, dialogue system, ability and effect system, grid system, event-driven architecture, save/load system, UGUI, and custom editor tools; integrated Wwise (audio), Spine (animation), and Localization.
- Achieved 20k wishlists and 88% positive reviews (English-speaking players); featured twice by SplatterCatGaming (950k subscribers).

### Unity Developer on *Toca Days*

*Toca Boca (Contract)* · Q3 2023 – Q2 2024

- Built the hard/soft currency in-game shops for a large-scale multiplayer mobile game using UGUI with backend API integrations; delivered for soft launch Q1 2024.
- Collaborated across design, art, production, backend, and multiplayer teams in a large professional studio.

### Frontend Developer on *Bokadirect Business Platform*

*Bokadirect (Contract)* · Q2 2022 – Q4 2022

- Led the shift to a mobile-first responsive design; completed 25% of Q3 product goals by redesigning the navigation and header.
- Introduced TypeScript, SCSS, and template linting across ~100k lines of Angular code.
- Configured linting and did debugging in the Azure DevOps CI/CD pipeline.

### Unity Developer on *Tankquiz*

*Netlight* · Q4 2021 – Q2 2022

- Developed a 3D multiplayer quiz game using Mirror Networking and AWS, targeting mobile, desktop, and WebGL.

### Algorithm / Unity Developer on *Mixed-Initiative Tile-Based Designer*

*KTH Royal Institute of Technology* · Q1 2021 – Q3 2021

- Created an open-source procedural framework for 2D level design in Unity, later cited in IEEE research (2025).

## Education

M.Sc. Computer Science · KTH Royal Institute of Technology (2015–2021)

Study Abroad · California Polytechnic State University, San Luis Obispo (2019–2020)

## Technical Skills

**Languages:** C# · .NET · JavaScript / TypeScript · Python · SQL · Node.js · HTML & CSS

**Unity & Tools:** Unity (UGUI, Mirror, Shader Graph, Cinemachine, Localization, Addressables) · Wwise · Spine · Angular · Figma · JetBrains Rider · GitKraken

**Expertise:** Procedural generation · AI & state machines · Gameplay systems · Multiplayer & networking (Mirror/UNET) · Event-driven architecture · UI systems · REST APIs · Performance & optimisation

**Infrastructure:** Git · AWS · Azure DevOps
